

Student Presentation:

Teen Sexual Activity~ What's the big deal anyway?

The New Jersey Physicians Advisory Group will provide an interactive and informative 60-minute presentation, sharing real world stories and providing teens with information they will talk about for months. Teens will be empowered to make smart sexual decisions and to....“Think it through!” This dynamic presentation is pertinent for all teens, whether sexually experienced or not.

Topics Discussed:

- **What led us to a sexually saturated society**
(It wasn't always like this!)
- **The physical and emotional impact of teen sexual activity** (How's it working for teens?)
- **Our epidemic of sexually transmitted diseases**
(1 out of 4 teens having sex has an STD.)
- **Having a future focus vs. instant gratification**
(15 minutes can impact a life-time.)
- **Building skills for personal boundaries**
(How to decide your limits.)
- **Knowing the difference between love, sexual attraction and infatuation**

Help your teens become informed
and ready to make
the best choices for a healthy future!
